Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the sealing surface of the lid formed as a sloping surface (claim 3) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claim 1 objected to because of the following informalities: "shellcomposed" is recited in the first line. It is presumed this is intended to be "shell composed" and will be read accordingly. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Voight et al (5,555,671).
5. Voight discloses a storage compartment with a harder outer plastic shell and a softer plastic liner made of polyurethane bonded to the interior of the shell. The top edge of the liner is even with the top edge of the outer shell thus providing a sealing ring for contact with the lid (Figures 1-4, column 3, lines 13-22 and column 4, lines 4-7).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Voight et al in view of Cowan (2,687,157). Voight et al discloses the invention except for the sealing surface of the lid formed as a sloping surface. Cowan discloses a storage compartment with the sealing surface of the lid (12a) having a sloping surface to mate with a like surface of the container base (10b, column 2, lines 55-59 and column 3, lines 13-18) to provide a more secure seal and alignment of the lid with the base. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have incorporated the use of a sealing surface on the lid formed as a sloping surface as disclosed by Cowan in the storage compartment disclosed by Voight et al to provide a more secure seal and alignment of the lid with the base.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Janctos (6,041,957) discloses a storage container with a hard outer shell and a softer liner.
